

MUHAMAMD NUR SYAFII

Web Developer — Fullstack (MERN & Laravel)

Yogyakarta, Indonesia | muhadevv@gmail.com | linkedin.com/in/muhadevv | github.com/muhagit

SUMMARY

7th-semester Informatics student at Universitas AMIKOM Yogyakarta (GPA 3.76) with a focus on fullstack web development. Experienced building applications with React, Vue, Next.js, Express, and Laravel, and comfortable working with REST APIs and MongoDB & MySQL databases. Active in self-development programs such as the Google Student Ambassador program and a fullstack developer bootcamp, and involved in campus tech communities. Currently completing a final-year thesis on a gamification-based JavaScript programming quest platform.

EDUCATION

Universitas AMIKOM Yogyakarta 2023 – Present
B.Sc. in Informatics · Semester 7 · GPA 3.76 / 4.00

- Currently writing a thesis titled "Implementation of Gamification Features in a Web-Based JavaScript Programming Quest Platform with Real-Time Code Sandboxing".

EXPERIENCE & PROGRAMS

Fullstack Developer (MERN Stack) — Bootcamp 2025
Lastmile

- Completed an intensive bootcamp in the MERN Stack Fullstack Developer division, building end-to-end web applications with MongoDB, Express, React, and Node.js.

Google Student Ambassador 2025
Google

- Selected as a student representative to share Google technology insights across campus and the wider community.

Member 2023
AMIKOM Computer Club (student organization), Universitas AMIKOM Yogyakarta

- Joined a student organization focused on developing computing and programming skills.

TECHNICAL SKILLS

Frontend	React, Vue, Next.js, JavaScript
Backend	Node.js, Express, Laravel, REST API
Database	MongoDB, MySQL

PROJECTS

JavaScript Programming Gamification Quest Platform In Progress
Final-Year Thesis Project

- Designing and developing a web-based JavaScript programming quest platform with gamification features and real-time code sandboxing to boost student learning motivation.

Nicky Frozen — POS Application Personal Project
Web Application

- Developed a web-based Point of Sale (POS) application for a frozen food company with three user roles: owner, cashier, and admin.

Public Complaint Service Website Personal Project
Web Application

- Built a website that serves as an intermediary for submitting public complaints to the relevant authorities.
